

Connor Patrick Hyde

Walnut Creek, CA | (925) 499-5153 | cph72@cornell.edu | [linkedin.com/in/connorphyde](https://www.linkedin.com/in/connorphyde)

EDUCATION

CORNELL UNIVERSITY, DUFFIELD COLLEGE OF ENGINEERING

Bachelor of Science in Mechanical Engineering

Minors: Aerospace Engineering

Relevant Coursework: Dynamics, Statics & Mechanics of Solid, Thermodynamics, Differential Equations, Linear Algebra, Multivariable Calculus, Introduction to Mechanical Design

ITHACA, NY

Expected May 2028

GPA: 3.66

RELEVANT EXPERIENCE

CORNELL HYPERLOOP – PROJECT TEAM

ITHACA, NY

Machining Lead and Braking Sub-Team

October 2024 - Present

- Redesigned pneumatic braking system in SolidWorks on a 4-person sub-team, resolving actuator and spring mounting constraints; achieved >30% size/weight reduction while maintaining performance within a \$1k budget
- Simplified and optimized pneumatic architecture by eliminating 3 redundant elements, designing and printing a consolidated carriage, and implementing a regulator that increased braking capacity by 10×
- Validated design via ANSYS achieving a FOS 6.5 and maximum deflection <0.003 in, then manufactured 10 precision components using manual lathe and mill, ensuring brakes will reliably stop a 200lb pod in 5 seconds
- Led machining coordination for a 20-person mechanical team producing 60+ parts, tracking tasks in Excel, assigning fabrication with deadlines, and reserving machines weekly to ensure on-time system integration
- Conducted regenerative braking research, testing concepts that significantly improved stopping performance

MANUFACTURING LEARNING STUDIO

ITHACA, NY

Instructor

August 2025 - Present

- Certified as a green apron machinist with 100+ hours of shop experience and demonstrated leadership, authorized to operate advanced programmable machinery and proficient in manual lathe and mill operations
- Delivered 50+ hours of machining instruction through 2.5-hour training sessions, qualifying users for red aprons by teaching shop safety, and core lathe and mill operations including facing, drilling, and tapping

HTC ENGINEERS (MEP)

WALNUT CREEK, CA

Engineer Intern

June – August 2023

- Updated and maintained HVAC, plumbing, and electrical layouts for up to 40,000 sq ft hospital floors across 3 facilities using AutoCAD, leveraging 40+ programmed commands to efficiently model the system components
- Collected and analyzed airflow and pressure data from hospital rooms, organizing results in Excel to validate ventilation performance and support equipment selection for proper room-specific airflow requirements

EXTRACURRICULARS

HEIGHTS ADVISORS

May - July 2025

- Transformed a 98-unit Philadelphia foreclosed dormitory into a 90% occupancy apartment building within 6 months, renovating 75% of units tripling its worth from its selling price of \$7M to its new value of \$22M
- Turned outdated offices and common spaces into a gym, conference room, and community center within a \$20,000 budget, reducing costs through vendor negotiation, secondhand furnishings, and supplier price comparisons
- Gave up to 60 tours of units a week, selling 26 leases across a 3-week period during the heat of leasing season

BAR DOWN LACROSSE

June 2023 - August 2024

- Confounded and coached personalized, affordable 3-day lacrosse camps for players of all skill levels, designing and leading 7 structured sessions for 15+ athletes, serving as a mentor drawing on 10 years of experience
- Marketed camps through social media, email outreach, flyers, and partnerships with local teams, generating strong enrollment, repeat attendance, and highly positive feedback from participating families

SIGMA PI HOUSE MANAGER

October 2025 - Present

- Managed \$3,000+ in building projects, delivering a 4×8×6 ft podium, plumbed bar, and hidden bookcase door by organizing material lists, securing funding, developing drawings in AutoCAD, and leading construction efforts
- Coordinated ongoing house operations by liaising with contractors (HVAC, plumbing, maintenance), resolving facility issues efficiently, and ensuring compliance with fire inspections and permitting requirements

SKILLS AND INTERESTS

Software and Programming: SolidWorks, AutoCAD, Fusion, Ansys, MATLAB, Python, Java, Excel

Interests: PADI Scuba Diving, Carpentry, Rock Climbing, Snow Sports, Hiking, Lacrosse, Astronomy
